

A HANDY HINT FROM KEVIN WILLIAMS CIRCLIP PLIERS

Ever have trouble attaching leg rings to your *Neophemas*? After many years of frustration, I thought there's got to be a better way than using the little aluminium jiggers supplied with the rings.

Some years ago I purchased a pair of Circlip pliers, as I thought they'd be suitable for opening both plastic and aluminium rings just wide enough to pop on the bird's leg.

Problem solved...works a treat!

Circlips can also be used to remove unwanted rings.
